

Accessible Information Standard

The accessible information standard is a new mandatory standard that all NHS and publicly funded adult social care services must follow.

Who is this for?

People with a disability, impairment or a sensory loss.

The aim

People will have information they can understand and the communication support they need.

If you or someone you know has a communication need or require information given in a specialist format please ask for a form from reception to detail your communication and information preferences.

Thank you
